-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-12 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Grushkin et al. No distinction is seen between the process and apparatus disclosed by Grushkin et al, and that recited in claims 1-12. Grushkin et al disclose in the Abstract that the reaction temperature between the ammonia and chlorine may be as low as 250 C. Regarding claims 9 -12, reaction zone 9 of Grushkin et al would appear to be a laminar flow region.

Claim ¹³/~~12~~ is rejected under 35 U.S.C. 103(a) as being unpatentable over Grushkin et al. It would be obvious to supply the ammonia and/or chlorine by injection nozzles in the apparatus of Grushkin et al, since injection nozzles are typically used to supply gases.

Claims 11-13 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Holst et al. No distinction is seen between the apparatus disclosed by Holst et al, and that recited in claims 11-13. Holst

et al disclose at col. 12, lines 39-51 a vertical heated tube into which gas is injected to closely simulate laminar flow, and into which air is also injected.

The Drawings and specification are objected to under 37 CFR 1.84(u)(1) in referring to the sole figure as "Figure 1".

The other references are made of record for disclosing various methods for making chloramine.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Wayne Langel whose telephone number is 571-272-1353. The examiner can normally be reached on Monday through Friday, 8 am - 3:30 pm Eastern Time.
